

**Daviess County Agricultural Development Council
Report on Rural and Economic Development
Daviess County Agricultural Development Funds Distributed 2001 to 2017**

\$4,163,317 as of September 2017

- \$1,493,854** **County Agriculture Investment Program** - Individuals were allowed flexibility to choose from a wide range of products to best fit their needs in order to improve net farm income.
- \$549,127** **Beef Cattle Herd Improvement**
- **\$310,073** in county funds was used to purchase cattle handling facilities that enabled producers to safely handle livestock in preparation for market.
 - **\$166,211** in funds was for herd genetic improvement. Herds were improved by funding producers to purchase superior bulls and semen.
 - **\$72,843** in funds was used for forage improvement assistance allowing producers to improve health, growth rate, and pasture sustainability.
- \$471,972** **On-Farm Drainage Enhancement** - Funds were used to install tile drainage systems that enabled producers to plant earlier, improve yields, and lower input costs.
- \$250,002** **Hay, Straw & Commodity Storage** - Funds were used to construct or renovate existing barns for the purpose of improving the quality of harvested and fed hay in Daviess County, and to provide price advantage for storing grain on the farm.
- \$231,600** **Daviess County Youth Agriculture Production Cost Share** - Cost Share funding to provide Daviess County youth an opportunity to develop an agricultural production enterprise.
- \$194,366** **Agricultural Diversification Program Cost Share**
- Funds have been used for projects including: Fruit production including apples, grapes, strawberries, and blueberries; tree production by pot-in-pot method and field mum production; multiple greenhouse constructions and a honey processing facility.
- \$171,942** **Model Program: Menu Approach** - 2008 was the first year all money was pooled so that individuals could choose the model program that best fit their needs.
- \$110,594** **Kentucky Agricultural Relief Effort** - KARE was created by Governor Beshear as a one-time opportunity for farms to receive economic relief from losses incurred from 2007 freeze and drought.

- \$94,977** **Western Kentucky Grower Cooperative** - County funds were used to buy equipment to allow local growers to expand vegetable production to commercial volumes and for equipment in plant to increase co-op volume to accommodate new or increasing growing producers.
- \$82,563** **Owensboro Farmers' Market**
- \$69,564 To facilitate the construction of permanent market facility.
 - \$13,000 Feasibility study to determine how to best move forward with permanent location. Brochures printed about the farmers were placed in local hotels. As a result, several out-of-town guests stopped at the market.
- \$78,976** **Daviess County Lions Club Fair Board** - Funds to be used in conjunction with other money to construct the Tom Curtsinger Agricultural Education Center. Building will be used for local and regional agricultural education and exhibition events.
- \$73,200** **Technology Systems Enhancement**
- Funds were used to install and upgrade modern technology tools vital to improving yields and lowering input costs on harvest and application equipment.
- Cost share for cattle producers to purchase electronic identification equipment necessary for implementation of the National Animal Identification System mandate.
- \$52,800** **Owensboro Community & Technical College**
- \$25,300 was used for a greenhouse. Students gain practical horticultural knowledge through use of the greenhouse, and it helps provide the knowledgeable workforce demanded by the horticulture industry.
 - \$20,000 for a producer training program to provide knowledge and skills demanded by modern agriculture production and management.
 - \$7,500 was used to assist in construction of the Vet Tech program large animal handling facility.
- \$42,000** **Commercial Poultry Production** - Program developed to allow expansion of existing poultry operations and construction development of new operations.
- \$40,742** **Goat Diversification** - Funds were used to help producers purchase high-quality stock and handling equipment.
- \$25,000** **Daviess County Fiscal Court** - Funds were used to allow for the completion of the storm water master plan phase II. Adequate drainage is vital to the agricultural economy in Daviess County. The county Ag development council recognizes the importance of the drainage plan in its effort to discover ways to minimize flooding in agricultural and residential settings.
