# LIVESTOCK CLUB MEETING MINUTES FROM MARCH 6, 2025

Called to Order at 6:00 pm.

Goat Club Leader Lindsey Dewig gave introductory information regarding this year's upcoming events including the Scholarship Auction.

Next, President Jolene Raymer introduced our program for the night, a cheese tasting led by Becky Rowe. Ms. Rowe discussed the importance of dairy and the different preservation methods for fresh milk. As a part of this, she brought different kinds of cheese from all over the world, including France, Italy, and Germany. The 4-Hers had the opportunity to sample these as well as goat and sheep cheese, and experiment with flavor pairings.

I asked a few 4-H members what they learned and here were their answers!

- Milk is crucial for all mammals, because it is such a good source of calcium and protein.
- Different animals have slight differences in milk because each mother's milk changes to meet the specific needs of her baby.
- Despite milk's importance, there is a lack of small-scale dairies.
- Most of our milk is processed in large scale factories by machines, and thus cheesemaking is an art that not many people have a talent for.

Lastly, Livestock Club members had the opportunity to meet with the individual club leaders about the upcoming projects for this summer. Club leaders shared information about where and when to get show animals, as well as upcoming meeting dates

Overall, it was a wonderful Livestock Club meeting! Thank you to Becky Rowe for presenting and all the families who attended!
